

# Would you use a standard screwdriver on a Phillips screwhead?

## JCM Waffletechnology Cleaning Cards - built to fit JCM Bill Validators.

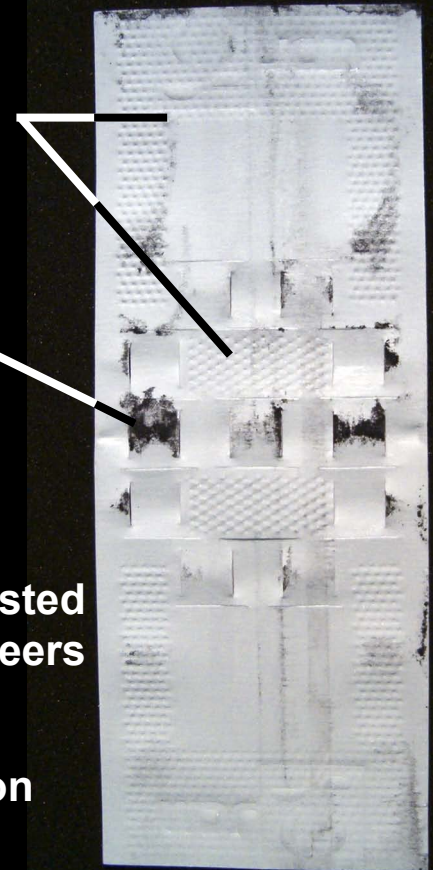

### Original Waffletechnology

### Improvements

- Traction Aids placement
- Waffles that meet width, height and placement requirements.
- Longer Card for aligning cleaning features to JCM Validators internal components.
- The only cleaning card Tested and Approved by the Engineers at JCM.
- Will not void the warranty on JCM Validators.

### JCM Waffletechnology

The product depicted here was used in the JCM UBA model. The JCM validator sensors, belts and rollers were dusted with a black chalk dust for this comparison photo. The Original Waffletechnology Cleaning Card was inserted first, then it was followed up with the new JCM Waffletechnology Cleaning Card. The results are dramatic! Use the right tool for the job...JCM Waffletechnology.

Authorized Distributors of JCM Waffletechnology Cleaning Cards may not be distributors of other JCM products and parts.
