

Cleaning Cards & Kits

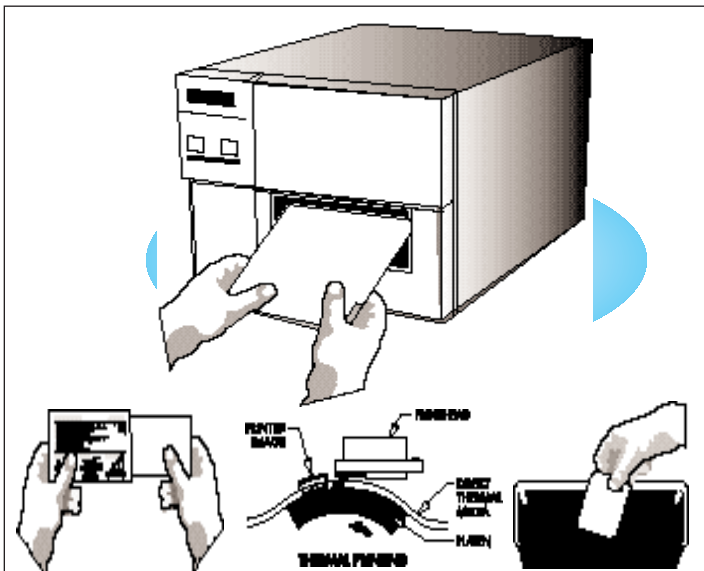

For Thermal Printer Maintenance

Thermal Printers are used extensively for printing labels, receipts, shipping and inventory control. The printers are fast and give a clear image at a low cost. After several hours of use however, the print medium can begin to accumulate on the print head, degrading the print quality and leaving black flecks on the printed surface.

What is a Cleaning Card?

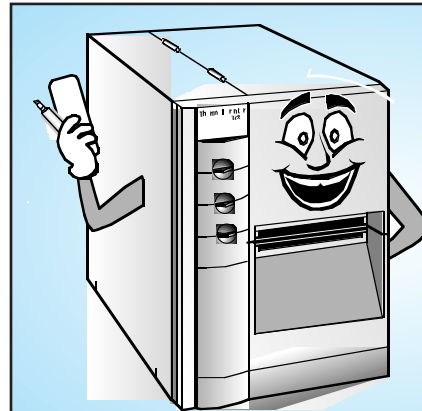

Print heads need to be cleaned every time you change your ribbon or labels. Our technically advanced cleaning cards are uniquely made to remove all forms of dust, dirt and other contaminants. Each cleaning card is conveniently pre saturated and sealed in foil to ensure a clean card and the proper amount of solution for each cleaning. Therefore, they will effectively remove grease, light oils, oxides and mineral residue. Our cleaning cards are supported and laminated with a lint free non-abrasive material that will not shed or leave behind fibers. Our cards are designed to clean the latest equipment and are unconditionally guaranteed.

Our Thermal Printer Cleaning Card will keep expensive professional maintenance visits limited to a minimum.

1. Easy 2. Effective 3. Safe

Today's equipment requires more attention to preventative maintenance than ever before.
