

Swabs/Applicators/Buds

Foam or Cotton Tipped, Pre-saturated or Dry

Heading straight to the top as your one-source supplier of Cleaning Solutions for your preventative maintenance needs

What is an E-Z Foam Swab?

Plastic handles with foam bud for cleaning read/write heads and drives. Flexibility and thinness of foam tip and rigid handle allows access into narrow areas. Abrasion resistant foam ensures thorough cleaning. Foam bud provides reservoir for cleaning solution.

What is an E-Z Swab?

Rigid wooden handles with buds of pure cotton are ideal to clean awkward corners and difficult to reach parts of equipment.

What is a Snap Swab?

Plastic reservoir handle holds isopropanol (IPA) alcohol and is "snapped" to release this cleaning agent onto the spatula foam tip. Wide flexible foam head is ideal for cleaning all electronic equipment and surfaces.

What is a Micro Tip Swab?

Designed principally for today's microprocessing systems and technology these versatile swabs will provide use in limitless projects and requirements.

Swabs for every need

Multiple swabs with a variety of handles and tips to choose from. Choose the swabs that will meet your needs for reaching into narrow areas. Abrasion resistant tips ensure thorough cleaning.
